

## **Manipulation of Perception and Management of Perception from the UK GB, Hindi Pakistani, Central and South American, Russia, RNC, DNC political operatives**

### Types of Perception Management

- What you perceive the other person is saying to you. 'It's the thought that counts' system.
- Intuition
- Telepathy, Space Satellite System Connection Only
- Sympathetic Feelings
- What observers would think of you if they could use your brain to think and observe you.
- What your electronics things do and signal can be manipulated. MRI Images of things and people.

### **'It's the thought that counts' system, What you perceive others to be saying to you.**

The ECHELON Space Satellite System has allowed people to deliver messages to the inner ear, the observed place on the brain the receiver usually receives messages, to imitate or replace a form of inter-communication.

The use of an electronic, aural Array system (HAARP) has created the ability to pre-program (script) interactions between people, inter-communication, conversations and events in open and closed spaces and most recently, under water.

Events are timed, trigger emotions and responses (participants are observed and psychological profiles in a database are used) so if you would like to avoid an interaction, relax yourself and avoid expressing anger, most times all anyone would have to do is wait.

Routines in a building or office are timed and recorded in a taped Array system. When someone using the Array system wants to get something done, they time their interaction and can either affect an accelerated therefore oblivious or blind interaction where illegal activity would go unnoticed or pretend to know what is going to happen next because the minds of the people in the office are used to determine responses and responses are timed.

Screenwriter's Caps: Programming of people's interactions at events have been managed by Actors who have worked on Screenwriter's Caps. A person sits down and thinks of events in their mind while on narcotics or connected to an electronic system as though these events had happened in real life and would repeat easily. Targeted people have been electronically kidnapped using this electronic Space Satellite System .

### **Infiltration**

Cult activity would encourage Infiltration or the presence of what is known as 'Insurgents' in people's lives, most recently popularized as 'Phantoms', 'Phantom Menaces', or 'Phantom of the Opera'.

Cult members who are either schizophrenic or insane, claim your body to be their body, your mind to be their mind and attempt to claim that anything you do is only because of their will. Actors have recently (post year 2000) only used infiltration to observe events, listen for information that would be used in stock market activity, novels, news reports, screenplays, sit-coms or sit-dramas. UK GB Actors had made the mistake of claiming credit for any good event and any news event.

## **Telepathy, Space Satellite System Connection Only**

There has recently been a widespread occurrence of people claiming to be telepathic or have the 'inside track' on information. This is facilitated by stupid people who want to be called dictators, Gods, Lords or Kings. Infiltrators or 'Insurgents' using your body or brain to think while attempting to claim to think for you relay information to you that has come from the network of people they have also infiltrated in the same way.

## **Sympathetic Feelings**

When a male and female interact or converse there are supposedly sympathetic feelings as a result of the meeting. The ECHELON Space Satellite System has allowed narcotics users and those who use others as narcotics to send false signals. The person A would feel things the other person B does not intend for the person A to feel because person A and B are being stalked and 'Insurgents' are attempting to manipulate their lives.

A woman who does not think of sex or is not interested in a relationship would not send signals to any man she met. With the 'Infiltrators' stalking this woman, the men she met would feel things that would indicate either an easy physical relationship or interest in a relationship. The woman would then be unable to work with the man because everything between them would be about sex despite any pure business or social intent of the woman's.

## **What observers would think of you if they could use your brain to think and observe you.**

'Infiltrators' stalking targeted people, people with the same mannerisms reported in the news agencies, heard about in business circles, made of popular conversation would attempt to manage the perception of what others would experience if they were observers of your life or your habits.

Instead of being able to explain your day, your excuse for being late, your intent behind doing anything, the 'Infiltrator' would manage the perception from the mind of the other person either giving false sympathetic feelings or false telepathic conversations or inner thoughts to the other person.

'Programmed' mis-spellings of targeted people are also of the UK GB way of operating.

## **What your electronics things do and signal can be manipulated. MRI Images of things and people.**

MRI images of your electronic things, your brain or body's internal organs can be manipulated to function properly or contain or be missing text, simple programs or code.

With the use of news agencies, the mention of diabetes, a health or mental disorder with news of a targeted person's either code name, key phrase or key name, key mannerism or character trait, MRI images of the body's internal organs, skeletal structure and exterior image would be targeted, manipulated or maligned by the *Narcotics cult a party to plans of 'Creators' claiming to have created all life on Earth by virtue of having physical control of the stars, (Hollywood) planets (Restaurants, Countries' Plans Puppeted Scheduled), Universe (Models, Beauty Pagents, physical planets connected to a satellite system) and Galaxy (India has claimed to have a Miss Galaxy Beauty Pagent)*. Plan and signals are documented in the book, "Earth From Space" Firefly Books.

## **Programming and Signals of News Agencies, Advertisement Schedules, Public Relations Firms, Movie Release Schedules**

Continuing War Illegally Failed All Anglo Saxons, Christianity: Events scheduled would be manipulated with the systems and methods mentioned above to favor only Anglo Saxons. 'Brass in the Pocket' could easily happen if policemen's desires and wishes were known, the Narcotics cult 'possessed' the mind or body of the policemen in the region or 'zone'. Given a schedule, the good fortune of a Non Anglo Saxon has been re-directed to Anglo Saxons on top of giving Anglo Saxon 'deep inside' information on the ideas and inventive innovations of Non Anglo Saxons with their 'new found telepathic Human capabilities.'

**UK GB and Aryan Nations Constructing their Kingdom:** With information on decision makers, policy makers, law enforcement, work is done on the minds, habits, routines of targeted people to manipulate the standards or interests in government, business and youth communities.

The United States Government is being accused of participating in the UK GB's plan allowing designed neglect, intentional neglect in our Environmental, Education standards, standards in the practice of Immigration Law, Business Ethics and Journalism to affect a Genocide of poor, impoverished, exponentially exploited Non Anglo Saxons.

It is known that the Clinton Administration had been HAARPed during the Persian Gulf War (1991, the business Forever 21), the and the Bush Administration had participated in Eugenics experiments with Space Satellite Systems in Texas.

In the 1990's it was known to the Clinton Administration that the only enemy developing weapons was the UK GB and the European Union itself. Any mention of a WMD, Human Computer Brain Information Super Highway or Android project was only about the UK GB PM Blair.

The UK GB's well known tactic of maintaining a political Plutocracy, multi-faceted front on all issues to maintain a facade of conformity to International Standards has worked against all Anglo Saxons. The UK GB's only known intent was to use all plans of the 1930's, 40's, 50's, and 60's to condemn with stereotypes and color coding all non UK GB citizens and Non Anglo Saxons.

Use of a system infiltration with a Space Satellite System had caused what is commonly known as either puberty or mid-life crisis in those born after the 1930's, and had created the ability to believe in one race of people as 'Creators' of life on Earth as the UK GB had intended for Anglo Saxons only.

The Movie 'The Omen' released in 1975, became a cult classic with many instances and scenes repeated in popular movies many times to include, 'The Bullet', 'The Manic Monkeys', products like the battery-less flashlight, 'Contact' and movies about an 'Event Horizon.'

*All intent of the UK GB & EU was to use other people's money to develop technological capability to direct and profit from knowledge of events, business ideas, inventions and continue to do so from space, '2001' in a what would have been perceived as an all Anglo Saxon Earth without any value in Christianity or Mormonism while Anglo Saxons are in fact the minority population of Earth destroying Life on Earth with the promotion of the use of Narcotics.*

**The UK GB could not be 'Secret Santas' as Hawaii Aryans had supposedly learned to be.**
