

Able to non-frozen storage stuffs until -10 degree C.

It several times longer to keep freshness than conventional refrigerator.

Does not break a cell when defrosting. Non drip thawing.

Thawing --> Non-frozen storage --> thawing --> Non-frozen storage (During patent application)

Q-Bit Energy and plasma energy generation device

QBP System Q-Bit Industrial refrigerator

The world's first refrigerator !!

Long term keep freshness.

Long term storage and freshness retention of the ingredients and flower.

"Q-bit Industrial refrigerator" That the world's first technology was introduced.

This is a refrigerator equipped an implement which froms the light quantum energy and the plasma energy artificially.

Radiation of Q-Bit Energy

It's possible to add or process the QBP unit to a constant temperature and humidity storage and cold storage room of existence.

The light quantum energy (Q-Bit energy)

"The light quantum energy" is the super imperceptible vibration energy that several kinds of special ore layer which exists from the earth's formation time and the color energy of the three primary colors occur to which by the non-contact high-performance catalyst function. The light quantum energy which makes air, water, fuel and all other substances activate is the new technology by which the applicability at the many fields is expected of improvement of indoor environment, a purge of exhaust, soil improvement, improvement of water quality, organic cultivation and sick prevention.

The lineup of the Q-Bit industry refrigerator is a subsequent page.
